Approach to Understanding the Psychodynamics of Institutions,
Organizations and Society**

With:

**Consulting-Art Belgrade
Psycho-Social-Art Belgrade**

About the Event

The aim of the study days is to explore the ways of applying group analysis to the understanding of the social unconscious and society.

This Event shall focus in particular on linking Foulkesian Small / Median / Large group-analytic groups to Pichon-Rivière's operative groups, Argentinean tradition in reflection groups and Serbian reflective-citizens groups.

Our **main goals** will be to:

- create a methodology for exploring the social unconscious;
- experience group-analytic space and reflection space;
- combine Foulkesian group analytic groups, and Pichon-Rivière's operative/reflection groups;
- provide a space for co-reflection of participants of the workshop with citizens during a joint day of the Summer Reflective-Citizens Event.

In four days of meeting we will have **daily presentations, social dreaming groups, small, median and large analytic groups** intertwined with **reflection groups** based on Argentinean tradition. The idea to combine experience and reflection might allow us on the experiential level to raise latent contents steaming from the matrix, recognized by the group and the conveners, which could be explored in the reflexive level. **The last day** of the event will be devoted the **joint reflective citizens sessions** with citizens and **with the other participants** (from Serbia and international).
